

Sea Viking Experiment Design Working Group Meeting #2

Joint Forcible Entry
Operations

8 June 2004

Purpose

- Discuss the results of the from the SV-04 Joint Forcible Entry Operations (JFEO) Capabilities Seminar
 - Preliminary insights
 - Objectives / guidance
- Discuss way ahead and potential guidance for continued developments toward the October AWE

SV 04 Capabilities Seminar Objectives

- Identify future JFEO required capability shortfalls
- Identify future JFEO issues
- Identify Naval / Joint C2 issues and relationships
- Identify future MEB capability sets
- Prioritize capability shortfalls and issues for presentation to CMC / CNO

Capabilities Seminar will shape CONOPS development in support of the October AWE and lay foundation for Sea Viking 05 / 06

Capability Seminar Quicklook

- Plenary Overview
 - JFEO JIC
 - JFEO CBA
 - JFCOM Hypothesis Testing
- Three CONOPS discussion sessions
 - Joint Advance Force Operations
 - Gain Entry / Set Conditions for Transition
 - Transition / Decisive Operations
- Nine CONOPS briefings
 - 30+ Capability Set Recommendations
 - Included in briefing books
- Seven Key Insights
 - Recommended by Senior Mentors

Capability Seminar

Seven Key Insights

- Seabased C2
- End to End Connectors
- Future Joint Fires Coordination & Targeting
- JFEO Shaping
- Joint Shield
- Persistent Blue Force Tracking
- Joint Logistics

AWE Objective Guidance

- Recommend all seven insights identified during the Capability Seminar be used to develop objectives IAW initial CMC SV guidance
 - Specifically look at:
 - Future Fires Coordination in JFEO
 - Seabased C2 and relationship to CTF
 - Information Operations
 - Force flow & sustainment requirements
 - Distributed Operations
 - Forward presence / regional engagement JFEO contributions
- Continue to work with JFCOM objectives
 - Inform and assess JFEO and MCO Concept Papers
 - Assess specific capabilities associated with JFEO tasks
- Submit AWE Objectives to CG MCCDC NLT 15 Jun 2004 for approval

Additional Guidance

- Keep moving ball up the court
- Some issues still need to be resolved (USMC location for MEB, etc.)
- Decision on 2nd Flt (CTF/Embedded with SJTF-CE)
- Other Service/Joint Objectives (will get to if it fits within the design of experiment, but will not be drivers of design)
- Battle Rhythms, boards, cells (just what is needed to get objectives)
- Any objectives proposed will have a tax to pay in resources to make it work
- Identify what needs to be done to make this work and get a firm schedule together
- Biggest issue is developing a CTF CONOPS to put all in perspective
- From the CTF CONOPS and associated deliverables we need a comprehensive POA&M
